<tbody>
<tr>
<td>10:00-11:00</td>
<td><strong>Sponsored Symposia</strong></td>
<td>Chair: Kirsty Bannister (United Kingdom) Chair: Stephen McMahon (United Kingdom) 1. Monoaminergic regulation of diffuse noxious inhibitory controls (DNIC): new insights for the treatment of pain 2. Neuroplasticity and chronic pain 3. Pain in craniofacial pain and its management: perspectives from the CNP committee</td>
</tr>
<tr>
<td>11:00-12:00</td>
<td><strong>2691 - CONDITIONAL PAIN MODULATION: FROM BASIC SCIENCE TO CLINICAL APPLICATION</strong></td>
<td>Chair: Boris Zernikow (Germany) 1. Long-term outcome of pain and morphine treatment in the neonates: 9 year follow up 2. Long-term outcome of functional chronic pain after a multimodal pain treatment: 4 year follow up</td>
</tr>
<tr>
<td>12:00-13:00</td>
<td><strong>2629 - PLACEBO EFFECTS: STATE OF ART, PREDICTION AND ETHICAL CONSIDERATIONS</strong></td>
<td>Chair: Lene Vase Toft (Denmark) 1. Exploring the neurobiological basis of placebo analgesia: new evidence of placebo phenotypes 2. Discussion of how the placebo response may influence the outcome of clinical trials 3. Ethical and practical considerations for and against placebo control in the assessment of the effectiveness of physical and surgical analgesic interventions</td>
</tr>
<tr>
<td>13:00-14:00</td>
<td><strong>2665 - CAN WE PREDICT AND PREVENT NEUROPATHIC PAIN?</strong></td>
<td>Chair: Thomas Graven-Nielsen (Denmark) 1. Plasticity in central pain pathways: effects of treatment and implications for pain management 2. Predicting pain after damage of the central nervous system 3. Psychosocial factors associated with neuropathic pain in people with HIV</td>
</tr>
<tr>
<td>14:00-15:00</td>
<td><strong>2694 - NOVEL INSIGHT AND TREATMENT OF MALADAPTIVE NEUROPLASTICITY IN MUSCULOSKELETAL PAIN</strong></td>
<td>Chair: Chris Wells (Portugal) 1. How to promote pain self-management from the start 2. How to promote educational pain self-management in timed based appointments</td>
</tr>
<tr>
<td>15:00-16:00</td>
<td><strong>2601 - THE MANAGEMENT OF REFRACTORY NEUROPATHIC PAIN: TOWARDS INNOVATING TREATMENTS</strong></td>
<td>Chair: Manoel Jacobsen Teixeira (Brazil) 1. Motor cortex stimulation by non-invasive RTMS and invasive neurostimulation: Optimizing protocols and patient selection 2. Transcranial direct current stimulation for chronic pain: mechanisms and clinical efficacy 3. Psychological Therapies: focus on anxiety, depression and chronic pain</td>
</tr>
</tbody>
</table>
1. Pro’s: Present clinical evidence supporting the efficacy of SCS and other techniques - Salim Hayek (USA)

2. Examine the current state of the neurmodulation Societal Impact of Pain Meeting: The classification of chronic pain as a condition and what it means for sponsored symposia.

3. Treatment responder profiles derived from the QUEPP, ELEVATE und PEPPERs multicenter studies - Christian Maihöfner (Germany)

Chair: Inge Timmers (The Netherlands) Chair: Karen D. Davis (Canada)

1. Neural mechanisms underlying graded exposure in vivo treatment for chronic low back pain and arthritis - Karen D. Davis (Canada)

Friday, 8 September 2017

Hall A - 2200 Hall B - 1100 Hall C - 560 Hall D - 582 Hall E - 310 Hall F - 310 Hall G - 310 Hall H - 85 Hall I - 55

Session 5: Pain related to cancer (3.3)

1. Total pain concept in cancer pain (Rainor Freynhagen, Germany)

2. Invasive Options in Cancer Pain (Silvio Brill, Israel)

Chair: José Castro-Lopes (Portugal)

1. Chronic pain definition, prevalence and its distribution across subgroups - Luís Filipe Ribeiro de Azevedo (Portugal)

2. From prognostic factors to management and prediction in chronic pain conditions - Danielle A. Van der Windt (United Kingdom)

3. The individual, societal and economic impact of chronic pain - Nina Køpke Vøllestad (Norway)

Chair: Rob Smeets (The Netherlands)

1. The bio-part of the biopsychosocial intervention: theoretical background and implementation in primary care practice - Tjerk Post (The Netherlands)

2. The psychosocial part of the biopsychosocial intervention: psychological background and implementation in primary care practice - Tjerk Post (The Netherlands)

3. An overview of a biopsychosocial intervention in primary care - Mark A. Oudejans (The Netherlands)

4. How do we define a biopsychosocial intervention? - Inge Timmers (The Netherlands)

Chair: Sam Kynman (Belgium)

Key note: GAfPA – bringing together doctors and patient advocates to fight for access to pain management - Neil Betteridge (UK)

Summary and interactive discussion - Brian Kennedy (UK)
Saturday, 9 September 2017
